

Homework 1

March 5, 2024

- You are required to use **Jupyter notebook** to finish this quantitative exercise. You may refer to **QuantEcon** for help. Use university computer lab if you do not have a personal computer.
- This homework must be finished independently!
- You must submit your solution before the end of Mar 13.

Set up a basic Python environment

1. Follow the steps in class to set up a basic Python environment on your computer.
2. Run test file “Test Code.ipynb” on your computer.
3. Save and export the result as a HTML file. Submit the HTML file to the following URL <https://yunbiz.wps.cn/c/collect/c0FG5gGgBfW>.
